Diameter

If it is a plastic fitting look for the size embossed on the outside of the fitting. Otherwise measure the inside diameter of the fitting. It is not likely to be the exact measurement as indicated above but we can generally determine the appropriate sizing once you supply us with this information. If we cannot determine the correct fitting we will send the most common fitting for that tank type. In the unlikely event it does not fit phone us and we can dispatch the correct fitting or we can advise the best fitting from the local hardware store

2.  **Valve**

These are designed specifically for Marley Rainwater Downpipes. **They will not fit stormwater pipes.**
